

CROSSFIELD CHRONICLE

VOL. XXIII. No. 18

CROSSFIELD, ALBERTA, MAY 15th., 1930

PRICE 1.50 A YEAR

When the Price of Wheat Drops!

When the price of wheat drops or the crop yield is disappointing, it is a hard blow to the exclusive grain farmer. When the same thing happens to a mixed farmer, he can afford to smile. He loses part of his grain profits, but his cows and hogs will turn him a good living and pay his debts until another harvest.

This has been proved so many times that it is a small wonder people are turning to dairying as the one sure way to financial independence. Look at Western Canada! The three prairie provinces of Manitoba, Saskatchewan and Alberta received last year \$67,730,553.35 for butter, cream, cheese and other dairy products. That is a lot of money and it went to those western farmers who raised cows.

The sale of milk, cream, butter and cheese is assured the year round. The prices paid for dairy products are always high enough to assure the farmer a profit. In winter, when money is needed most, the prices for dairy products are uniformly high.

One of the secrets of successful dairying is found in the cream separator. A good one will earn money with every turn—but a poor one will lose it just as fast. If you are now operating on an old cream separator that is pretty well worn, you should have your skin milk tested at the creamery. You may be surprised to find that you are losing cream every day.

A McCormick-Deering ball-bearing cream separator will pay for itself quickly on the average farm. IT GETS ALL THE CREAM—It is the easiest running machine in the world—it is easy to keep clean.

BEST OF ALL—it is easy to own. See us and learn how simple it is to use a McCormick-Deering cream separator while you pay for it. A demonstration right in your home will cost you nothing.

CROSSFIELD WON OPENING GAME

Last Year's Champions Have Easy Win Over Didsbury. Lee Hits Three Bagger

Crossfield won the opening game of the Rosebud Baseball League here on Wednesday night when they chalked-up an 8 to 2 victory over Didsbury in a game that went six innings. As an opener it was a good ball game, considering that several of our players have not had a ball in their hands previous to the game.

Lee pitched good ball for the locals, and was only touched for two safe hits, these coming in the third inning and coupled with two errors, gave Didsbury their only runs. Buck Eaton finished up the game for the locals when he went in and struck out the three men to face him.

Sweeney Luft was on the mound for Didsbury and pitched a fair game, although touched for 9 hits, one a three-bagger by Lee, he kept them fairly well scattered, errors behind him proved costly.

R. H. E.
Didsbury 002 000 2 2 6
Crossfield 021 005 8 9 4

Batteries—Luft and Wilson Lee, Eaton and McKinley Umpire: R. McCool
Crossfield—D. McKinley, c; H. Lee, p; B. Smart 1b; Doc Evans, 2b; J. McDowell, s.s.; Glen Williams 3b; I. Heywood, rf; A. Robertson, cf; E. Bills, lf; E. Eaton, p and 1b.

A good crowd turned out and \$37.00 was taken in at the gate.

Crossfield plays at Didsbury on May 16th, and at Olds on May 19th. Olds will play at Crossfield on May 21.

The local will go to Drumheller on Sunday, May 25th, where they will play the Macminnes a double header.

Crossfield defeated Didsbury in the first base ball game of the season here on Monday night. Neither team was at full strength, and several of the school boys filled in on both teams. Buck Eaton was on the mound for the locals and breezed along easily, with Everett Bills doing the receiving. There was nothing to it, the final score was 9 to 1.

At the manse on Monday of this week, Dr. J. A. Mullin of Claresholm was united in marriage with Miss Alice May Copley of Crossfield. Rev. H. Young performing the ceremony.

Alberta Poultry Commissioner To Speak at Board of Trade Meeting, May 22nd.

The regular monthly meeting of the Board of Trade will be held in the U. F. A. Hall on Thursday, May 22nd at 8 p. m. The speaker for the evening will be Mr. Cormie, Poultry Commissioner of the Province of Alberta. In order that everyone in the town and district may hear Mr. Cormie's instructive and interesting talk on poultry, the Board of Trade have declared an open night and you are urged to attend whether members or not.

Seeding Operations Completed in This District

Seeding in the district surrounding Crossfield is practically finished, and not in many years, have we enjoyed such fine soil conditions. The moisture has been sufficient to make the soil right for work and the continued showers which have been general throughout the surrounding district, have kept the seed bed just in the best possible growing condition.

The acreage sown to wheat in this district this season is just about the same as in former years.

Wheat is up in most fields and a lot of it is four or 5 inches high. We expect to hear that O. E. Jones will soon be cutting that wheat he put in on March 27th.

Charlie Weber finished up seeding last week and has 2,800 acres under crop.

Legal Holiday, May 24th.

Saturday, May 24th, a legal holiday, all places of business, including the post office will be closed. This will do away with the Wednesday holiday of next week.

Most of the towns and villages in Alberta publish their by-laws, but, I suppose it costs too much to do it here.

"Live and let live" would make a good subject for a sermon.

The Wheat Growing Situation in Russia

A writer in the Country Gentleman who has investigated the wheat growing situation in Russia does not think there is a great deal of danger to the farmers of the western hemisphere in the situation. The government farms vary in size from 3,000 to 300,000 acres and are inefficiently handled in every way. Thousands of tractors have been ruined by inexperienced operators and the country being farmed has a very uncertain rainfall. According to this authority Russia will export but little more wheat in the near future.

Local and General

Renew your subscription to the Chronicle. We kneed the dough. Mr. and Mrs. H. Ballam spent Wednesday afternoon in Calgary.

Dr. Kelso of Edmonton, spent Sunday, visiting his sister Mrs. W. Laut.

Mrs. N. A. Johnson and son spent Tuesday in Calgary.

Can "Good" Be Accomplished By "Force"?

Through the ages as man has struggled upward from his cave-dwelling to his present condition of semi-civilization,—for it requires only a hurried glance through the columns of any daily paper any day to prove that man is not yet fully civilized,—he has carried with him the brute instinct to try and accomplish things by force rather than by persuasion; instead of trying to win support to his views and convictions, he has tried to force it. The more civilized, the better educated man becomes, the more does he rely upon appeals to reason instead of having resort to force. None the less the state of the nations today, and our tendency to resort to the power of legislation and law to enforce opinions upon others, reveals how largely we still depend on force to govern our everyday affairs.

The question, therefore, naturally arises: Has any definite lasting good ever come to humanity through the exercise of force? Could one find a single, unquestionable instance in the whole range of human history where compulsion has been the direct and sole agency in changing the mental attitude, the belief, the convictions or the conscience-sense of any one normal intelligence? Without reserve one may venture to say "No" to both questions.

There is profound truth in Butler's couplet: "He that compels against his will is of his own opinion still." One may be persuaded to change one's mind, to take a different viewpoint, to espouse another belief, to modify or discard a long-held conviction, to give conscience a new direction, and through it all to act differently,—the action being either good or bad according to the prevailing general opinion; but it is scarcely to be doubted that force, no matter what its form or its avowed purpose, ever has or ever will bring about the only thing—a change of mind and heart—that is necessary to produce a new line of action. Without the voluntary conversion of the individual mind and heart, that is, of thought and conscience, there can be no reasonable expectancy of bringing about, definitely, permanently and dominantly, a new condition—social, economic, political, ethical, or moral. All our social reformers, our political leaders, our legislators, would do well to ponder this thought and pay closer heed to the lessons of experience and history.

If we would study impartially the action of unleased force directed with the ostensible purpose of producing good, we turn our eyes toward Russia today. True, the conflicting reports coming out of the country advise us to draw conclusions with a certain reserve; yet there is enough of what appears to be authentic to warrant the present view that the Soviet Government of Russia is using compulsion in the fullest meaning of the term, to impose its minority, compactly organized will upon the unorganized great majority of that vast country.

The Communists may tell us, as well as some three-fourths of the people of Russia, that persuasion, through "propaganda," is their chief agency for the building of a "New Russia"; but it is propaganda backed by armed force, by secret police, by studied cruelty, and by unrelenting terrorism. Putting the most charitable construction upon the Soviet's methods for the building of a "New Russia," they are trying to do what they consider to be good practically altogether by the exercise of force. A marvellously organized minority seeks to compel a helplessly disorganized majority to accept without question its views as to what is best for the political, social, economic and moral well-being of the whole.

And all history tells us that this cannot be done. Reform by force lasts just so long as the force which brought it about is strong enough to maintain it. Force not only invites opposition, but generates it. And soon or late, the opposing force becomes the more powerful, and we have another clash of forces, more disturbance and confusion, reaction, or, perhaps, some more compulsory "reformation." But we cannot say confidently that out of it all has come a single, definite step of progress. Force is the antithesis of co-operation, and without the voluntary co-operation of all the interests involved there can be no genuine progress.

What is true of Russia just now, would be equally true of any other country, or state, or community. No matter how desirable the proposed or initiated reform may be, force, if applied to it, eventually will defeat it. Without the voluntary and earnest co-operation of a pronounced majority of all concerned even unquestioned good is not likely to be achieved. And surely no intelligent person would be content with "forced good."

Learns To Read At Eighty-Two

A resident of Mount Clare, at the age of 82 years, is learning to read. The aged student said he was making fair progress and expected soon to be able to read a newspaper. He said that he never dreamed that there was a world such as is being unfolded to him by the printed page.

Canada Has Barred Importation Of Parrots

First Outbreak Of Parrot Fever Is Reported From British Columbia

Canada will declare immediately an absolute embargo on the importation and transportation of all birds of the parrot species as a result of representations from the British Columbia Department of Health, which is now engaged in systematic efforts to stamp out parrot fever.

Meanwhile, Dr. H. E. Young, provincial health officer, and his department, are engaged in a systematic campaign to confine the outbreak of parrot fever to a few cases around Vancouver.

They have been in telegraphic communication with United States authorities to secure the latest possible information on the subject.

"This is the first outbreak of this disease, so far as we know in the history of Canada," Dr. Young said.

The health department here has records of all parrots brought to Canada from the Orient in recent months, and is endeavoring to ascertain their present whereabouts so that they may be examined.

Pains Around Heart

Weak Spells
Would Fall Over

NEW APPOINTMENT

R. G. McNEILLIE

R. G. McNEILLIE

Prominent among the spring promotions of Canadian Pacific Railway officials was the appointment of R. G. McNeillie, as assistant passenger traffic manager of eastern lines, with headquarters at Montreal. Mr. McNeillie, who was general passenger agent, at Winnipeg, for eight years, left at the end of April for the east, his new appointment becoming effective May 1.

Mr. McNeillie entered the service of the Canadian Pacific Railway in 1901, as a stenographer in the general passenger department, at Winnipeg, becoming chief clerk in 1905. In that year he became acting district passenger agent at Nelson, B.C., and district passenger agent at Calgary, in 1910. He was promoted in 1913 to the position of assistant general passenger agent, western lines, with headquarters at Winnipeg, becoming general passenger agent in 1922.

Before his departure for Montreal, Mr. McNeillie was remembered by the members of the passenger department from the head of the lakes to Field, B.C., and at Minneapolis with a handsome lisle suit, with cut glass decanters and glasses, and a wardrobe suit case, the presentation made by C. E. McPherson, who is now acting in an advisory capacity to the passenger department.

WAS RUN DOWN AND VERY WEAK

Too Little Blood the Trouble

Mrs. Jas. A. Haughn, Bridgewater, N.S., writes:—"I was badly run down and very weak. So much so I could scarcely do my housework. My nerves were affected; my digestion poor; I had continued headaches and could not get a restful night's sleep. Different remedies I was growing discouraged. One day, however, I saw an advertisement of a case similar to mine which had been relieved by Dr. Williams' Pink Pills, so I decided to try them. A few weeks' use of the Pills fully restored my health and now my household duties are a pleasure instead of a torture."

Mrs. Houghn's family trouble was that she had too little blood. Dr. Williams' Pink Pills were of aid to her because they renewed and purified her blood and that good blood promoted good health, for where good blood abounds disease cannot exist.

You can get these Pills from any dealer in medicine or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Dates From Middle Ages

The expression, "The weakest goes to the wall," dates from the Middle Ages. In those days churches lacked roofs, and the congregation stood on the rush-strewn floor of the nave throughout the service. Along the wall ran a low stone seat, which was used by the aged and infirm. The seats which gave rise to the expression may still be seen in some churches.

Mothers Value This Oil.—Mothers who know how suddenly croup may seize their children and how necessary prompt action is in applying-renewal always keep a ready supply of Dr. Thomas' Electric Oil, because experience has taught them that this is an excellent preparation for the treatment of this ailment. And they are wise, for its various uses render it a valuable medicine.

Love not only "makes the world go round," but makes many a human inhabitant of the world go straight.

Douglas' Egyptian Liniment would be in every household. Stops bleeding at once, cauterizes wounds and prevents blood poisoning. Keeps away inflammation and prout flesh.

Air Service For Venice

Venice, the famous gondola city of Italy, is to have airplane connection with the outside world. A new commercial air service from Trieste to Marcellis is making an intermediary stop there, where it connects with the lines from Vienna and Rome. Tri-motored seaplanes are being used.

Read the Spiral with Minards.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and

harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

Pleased With Tour

British Headquarters Enthusiastic Over Reception Accorded Them In Canada

The party of English headmasters, who have been touring Canada, returned to Toronto enthusiastic over the reception tendered them throughout Canada and confident that the tour would result in the right kind of English boy being sent to Canada.

Dr. Cyril Norwood, chairman of the party, said that after studying Canadian educational methods, they would advise "quality immigration."

"We shall not advise our boys to come to Canada, unprepared, without money, expecting to find posts waiting for them," said Dr. Norwood.

"We shall tell them there are excellent universities, and that after leaving them they must make opportunities for themselves." Dr. Norwood believes that members of the Nordic strain are easily assimilated into the country, but that the flow from central Europe should be stopped.

Asthma Doesn't Wear Off Alone. Do not make the mistake of waiting for asthma to wear away by itself. While you are waiting the disease is actually gathering a stronger foothold and you live in danger of stronger and yet stronger attacks. Dr. J. D. Kellogg's Asthma Remedy taken early will prevent incipient condition from becoming chronic and saves hours of awful suffering.

Protecting Wild Geese

Manitoba Alarms Fined Ten Dollars

For Chasing Them

For disturbing the peace of Manitoba wild geese by chasing them in an airplane, Philip Oler was fined \$10 and costs by Magistrate R. M. Noble in provincial police court.

Game Warden Durant told the court that Oler had worried thousands of the birds, during the close season, when, in his plane, he pursued them between Rosser and Meadows.

He was told to advise his aviator friends to cut out the sport.

In the last ten years the Canadian Food has spent \$100,000.00 on new vessels built in British yards.

Spain's first olive oil congress was recently held at Brazil.

MacDonald's Message To McGill

Turns To Scriptures For Advice To University Students

Premier Ramsay MacDonald draws inspiration from the Scriptures when asked to pen a message to McGill students through the medium of the McGill Annual, which is dedicated to him.

"I write this looking over the rural grace of Chequers Park, but with McGill in my mind," Premier MacDonald states in his message. "You ask me for a few words more for the students. What of these? 'Whatsoever they hand findeth to do, do it with all thy might.'"

Worms are encouraged by morbid conditions of the stomach and bowels, and so subvert. Miller's Worm Powders will alter these conditions almost immediately and will keep the worms away. No destructive parasite can live in contact with this medicine, which is not only a worm destroyer, but a health-giving medicine most beneficial to the young constitution.

An order was made recently, at Blackpool, Eng., for the payment of a debt of \$600.00, at the rate of six cents a month,—which will require more than 80 years to clear up the account.

Elevated playgrounds about 14 feet above street level are proposed for the use of children in New York's crowded tenement districts.

Over Thirty Million Dollars Invested In Industries Using Clay From Canada's Deposits

Canada is fortunate in possessing resources in many types of clay employed in the manufacturing industries. In a list of 35 lines of manufacture in the Dominion, clay of one type or another appears among the supplies for 24 of them. It is used in large amounts in the making of such materials as cement, paper, and textiles. It is even used as a purifier of land and oils. Its greatest use, however, is in the so-called clay-working industries in which over a million and a half tons of various types of clay enter into the composition of the products each year. These industries represent an invested capital of over \$300,000,000 and employ almost 5,000 men.

These types of clay differ greatly in physical properties such as color in the natural and burned state, plasticity, strength when dry and burned, shrinkage, vitrification range and refractoriness. The clay used in the clay-working industries are classified according to the purposes for which they are adapted. For example, there are pottery clays, including china clay or kaolin and ball clay used in the compounding of porcelain; stoneware clay for making vitrified ware, and earthenware clay for making the more porous earthenware; refractory clays capable of withstanding very high temperatures in the manufacture of firebricks; sewer pipe clays which produce a dense impervious body capable of taking a salt glaze for the making of sewer pipes and similar products; and the clays and shales for the manufacture of structural brick and tile and farm drain tile.

The pottery clay cannot be said to be plentiful so far as distribution is concerned but there are a number of deposits of importance, particularly of china clay in Quebec and British Columbia; of ball clay in Saskatchewan; and of stoneware and earthenware clays in Nova Scotia, Saskatchewan and Alberta.

Fireclays are graded according to their refractoriness or the temperature which they can withstand in service, ranging from low heat duty. The high heat duty or high grade fireclays are of rather rare occurrence in Canada but the lower grades are of broader distribution. With the exception of Prince Edward Island and Manitoba, all the provinces of Canada are known to possess deposits of fireclay though some of the deposits are too remote from the markets to be of immediate value.

In the manufacture of building brick and structural and drain tile, common surface clays and shales are used, and to a lesser extent, low grade fireclays. Canada has immense resources of such clays and shales suitable for making good quality brick of a wide range of texture and color, distributed through the nine provinces, and there is ample evidence that good use is made of them. Close observers of conditions in Canada and the United States are struck by the greater proportion of brick structures, especially dwellings, in Canada.

In the ceramics laboratories of the department of mines which were established for the testing of clays and as an aid to the clay-working industries, a staff of engineers and assistants is engaged on various investigations bearing upon the problems of manufacture. Subjects of general interest to groups of ceramic manufacturers are investigated in detail, and technical advice and assistance in minor problems are freely given to individual manufacturers. The objects constantly being worked for are the improving and cheapening of the processes of manufacture and the aiding of the industry to produce better and wider ranges of wares.

Husky: "It is a mouse. I must get a trap tomorrow."

"A trap? I might forget it and get caught myself."—Pages Gales, Yverson.

W. N. U. 1897

The value of these services has recently been demonstrated through the successful outcome of an investigation of the drying of brick made from a certain type of clay very common in the prairie provinces. Bricks made from this clay are very difficult to dry without cracking even when the utmost care is exercised. A process was worked out and placed in operation in a plant with the result that the drying time was reduced to less than half, the drying loss practically eliminated and the finished brick greatly improved in quality. At this one plant a saving of many thousands of dollars was effected. The process which is applicable to many plants has since been adopted by several.

(By Eva A. Tingey)

CHIC LINES

All Tingley models are created in Paris and sketched by her. The patterns are made and adapted for American women in New York by American patternmakers.

A frock of exceptional smartness is this, yet one that is not at all difficult to carry out. The little bolero jacket is separate from the main dress. The latter is adjusted by shoulder straps.

Note how effectively the skirt section takes the curved line of the bolero, the greatest fullness of the shaped skirt fitting into a point as shown.

Mid blue crepe-like woolen made the original of this chic model. Lightweight tweed, jersey, rope, and material of a similar type are all suitable.

The belt can be of self tissue or leather, as preferred.

Edges can be finished with several lines of stitching, bias binding, or braid.

Good colors are most blues, greens, reds, beige, and tiny checks or spot effects.

This pattern may be obtained in sizes 16 to 20, and 34 to 40. It is ready for immediate delivery. It is hand cut.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Judge: "So your name is Muggie-worth?"

Applicant: "Yes, Your Honor."

Judge: "And you want the court to change it to Pullman. Now just tell me what you want it changed for?"

Applicant: "Well, Your Honor, to tell the truth, it was my wife's idea. She got to thinking that we ought to have the same name that is on our towels."

Will Boost Grain Show

Co-Operation Of British National Farmers' Union Is Promised

Stressing the fact that residents of the Old Country were "out for cheap food" and promising co-operation of the National Farmers' Union in giving publicity to the World Grain Exhibition and Conference to be held in 1932, Warner Baxter, Birmingham, England, past president of the Union, addressed a meeting of the Regina Board of Trade held in the Hotel Saskatchewan under the auspices of the agricultural division of the Board.

Mr. Baxter stated co-operation of the National Farmers' Union of Great Britain in boosting the World Grain Exhibition and Conference to be held in Regina, in 1932, would be forthcoming, and said that, through the 130,000 members of the union, the publicity through the Old Country would reach almost every possible exhibitor.

If assurance was given that exhibits sent over to Canada for the exhibition in Regina would be given a good display, he said there was no reason why a large number of exhibits should not be shown at the grain exhibition.

Quality Is Assured

People Can Depend On Government Inspected Fruit and Vegetables

The buyer of food products more than anyone else today must know that he is getting the quality he buys. The shipping point inspection service of the Fruit Branch of the Dominion Department of Agriculture has established the confidence of the "trade," from producer to consumer, in the reliability of the government certificate. From a modest 2,639 carloads inspected five years ago, the federal inspection service last year inspected 23,760 carloads of fruit and vegetables, an increase over the preceding year of 9,281 cars. More than that, the inspection service, having created confidence in quality and developed uniformity, has made inspected fruits and vegetables really popular on the larger markets, and in the export market premium prices have been obtained. The federal inspection service is a neutral determination of quality standard between buyer and seller established by certificate.

Must Grow More For Less

Reducing Production Costs Is Present Problem For Farmer

"Lower costs are necessary in farm production in Canada" is the view expressed by E. S. Hopkins, Field Husbandman of the Dominion Department of Agriculture. "In an era of low prices the only avenue of escape to the farmer is for him to strive to reduce his production costs still farther." Among the ways in which these costs can be lowered are the production of heavier yields per acre through better farming practices, the use of more labor-saving machinery. In these days of growing competition in both the domestic and export markets, the farmer who would succeed must grow more for less, and at the same time produce a quality which will sell better in the market than the competing product.

Joan: "Why do you always take two boy friends about you?"

Betty: "Oh, I find it useful to carry a spare!"

A VIRGINIA QUEEN

Sue Pollard, lovely daughter of Governor Pollard, of Virginia, who has been selected queen of annual Shenandoah apple blossom festival.

First Class Equipment Pays

Enables Farmer To Increase Production At Lower Cost

The three important factors in the cost of producing crops are land, labor and capital, and the human labor factor is the only one which is higher today than it was fifteen years ago, a statement prepared by officials of the Dominion Department of Agriculture shows. Field husbandmen therefore, stress the importance of making the hired man's wages count by supplying him with first class equipment so that wherever possible he may be able to do literally two days work in one. This is where modern farm machinery comes in. Eastern Canada crops take 20 hours labor per acre to harvest; Western Canada crops harvested with horse-drawn outfits take 11 hours labor per acre, and harvested with the use of the new combine harvester the labor cost is only 2.5 hours per acre.

May Own Sugar Plantations

Princess Mary's Second Son In Line To Inherit Property

Princess Mary's second son, the Hon. Gerald David Lascelles, who is now five years old, may become the owner of sugar plantations and other property in Barbados, West-Indies, under the will of his grandfather, the late Earl of Harwood, of Harwood House, Leeds. The earl left untested property of the gross value of \$380,000, with net personality \$263,288. He left the plantations on trust for his son, the Hon. Edward Cecil Lascelles, and being in full male, whom (sailing, to Princess Mary's son and his heirs in tail. Mr. Edward Lascelles is married, but has no children.

A Logical Conclusion

The pretty young kindergarten mistress had been telling her pupils all about the winds, their power, different effects and so on. "And, children," she went on, enthusiastically, "as I came to school this morning on the top of the bus something odd came and kissed my cheek. What do you think it was?"

The conductor? cried the children joyously.

Rock asphalt is being extensively used in rebuilding worn out pavements.

Western Farmers Living Up To Their Reputation For Optimism and Work

Insects Have Their Uses

Harmful In Some Ways, Are Protection In Others

Through years of investigation, scientists have found that insects, although harmful in some respects, greatly protect the garden plant from some of its worst enemies.

Following are some of the beneficial uses of bugs and insects:

Lady bug beetles feed on plant lice and scale insects, in all stages.

Hornets feed entirely on insects.

Frogs and toads feed largely on insects and slugs.

Lizards live on small beetles and insects.

Garden spiders feed on large flies, moths, etc.

Wasps are generally beneficial because predatory on other insects, which they use as food for their larvae.

Ground beetles feed on insects that go underground to pupate.

Bees are used as pollinizers and are indispensable to plant life.

Tree crickets feed on plant life.

Dragon flies feed on all insects.

Higher Standard Of Living

Statistics Show Average Canadian Family Is Buying More

The purchasing power of the Canadian people is demonstrated by the average increased consumption in Canadian homes of meat and poultry, indicating a higher standard of living, according to the Dominion Bureau of Statistics. The per capita consumption of beef, pork, mutton and lamb increased from 156.14 pounds in 1928, to 157.51 pounds in 1929; consumption of poultry increased from 10.12 pounds to 11.88 pounds per person, and consumption of eggs from 30.99 dozens to 30.87 dozens. The average Canadian family consumed in 1929, over nine-tenths of a beef, over two and a half hogs, and over four-fifths of a sheep or lamb, in addition to seven fowls, three-quarters of a turkey and approximately half a goose and half a duck.

Predicts Larger Farms

Machinery Will Make This Possible Says Alberta Man

Addressing the Canadian Club of Winnipeg, A. E. Ottewill, registrar of the University of Alberta, predicted much larger farms in Western Canada in the near future, making large use of mechanized labor. As an instance of present and future trends he said that C. S. Noble, of Nobleford, Alberta, had in 1929 harvested 50,000 acres of wheat, yielding 30 bushels to the acre, with a combine harvester and thrasher at the rate of one acre in 7 1/2 minutes running time.

A ship's surgeon said that seasickness is "simply acetonemia." Why should he say "simply"?

There are about 520 muscles that have to do with the moving of the human body.

Giant Rudder on Huge Truck

Sixty-seven tons of steel forged into a rudder to steer the 40,000-ton "Empress of Britain," Queen ship of the Canadian Pacific Atlantic fleet, was recently conveyed on the world's largest truck over a hundred miles of highway between Darlington, England, and Glasgow, Scotland, in seven days. The rudder which is 21 feet 9 inches by 20 feet 3 inches, could not be taken by railroad, and was transported on a 14-wheeled vehicle carrying a telephone at the rear from which directions were called to the driver. Headed by Automobile Association scouts, and shepherded by police, long stretches of the road had to be closed to other traffic while it passed and in certain areas telegraph poles had to be shifted temporarily. In some villages on the route there was a clearance of only 1 1/4 inches between the rudder and the walls of the houses. The rudder was delivered to the "Empress of Britain" ready to be placed in position.

A. E. Warren, vice-president of the Western region of the Canadian National Railways, reports that both farmers and business men of the prairie country are more hopeful than was the case a few months ago.

He comes to this conclusion after completing his latest trip through the West. Mr. Warren remarks that, "with his usual courage, the prairie farmer is not permitting market prices and discouraging reports to interfere with his work," and says that, except in isolated cases, the acreage being seeded this year is not being reduced. "Conditions favorable to the crop exist for the moment, and the rural atmosphere may be described as quite cheerful."

As suggesting an improvement in economic conditions in Canada generally, Mr. Warren's observations tend to bear out what his "chief," Sir Henry Thornton, has just remarked in New York. Sir Henry reports that business activity in Canada is steadily increasing and that normal conditions may again prevail by August. It is also of interest, in connection with Canadian conditions, to note the decision of the Federal Reserve Board of the United States to facilitate throughout the republic the acceptance of the Canadian dollar at par.

Western farmers are doing their full part in Canada's nation-wide effort to right himself after one or two unfortunate occurrences that served to injure, though far from imperil, her economic fabric, these lying in partial crop failure and the stock market crash of last year. Western farmers are doing this in their own interest and in the national interest. And they are doing it in the main by "sowing seed" and maintaining their traditional determination and cheerfulness. The man who keeps pegging away at his job, who keeps a stiff upper lip, and who carries a smile usually emerges successful, eventually, if not immediately. These are among the attributes and virtues of the average Western farmer, and these things explain why these days he is working overtime on the land with his seedling. Far from permitting himself to be consumed with worry over last year's setback, he is concerning himself with the present and the future and working with commendable and inspiring industry, hope and faith to turn them to account. The psychology of the prairie farmer is a standing rebuke to pessimism.—Regina Morning Leader-Post.

An Expensive Luxury

Duke Of Westminster's Yacht Is Elaborately Fitted Up

If you are looking for a nice little yacht for the coming season, you may be interested in the offering of the Duke of Westminster, who wishes to sell his "Flying Cloud," in which he recently cruised the Mediterranean. The vessel contains a ballroom, a large dining room, eight bedrooms, three sitting rooms, and a smoking room. They have many antiques. Each cabin has a four-post bed, and is furnished with antiques. The walls are hung with oil masters. The vessel's tonnage is 1,195, and her length 191 feet. She carries a spread of white sail covering 14,500 feet, when set.

Makes Landing Safer

A simple yet effective device has been installed on a few aeroplanes in England which aids them in landing on dark nights. Beneath each wing a small searchlight is fitted with the beams of light converging. The distance at which they cross each other, forming a large patch of light, is known to the pilot, so as soon as he sees the light on any surface he knows how far he is from the ground.

Stenographer: "Bob, dear, when we are married, will you continue to give me flowers every day?"

Clerk: "No. I'll give you a box of seeds and you can grow your own."

"Where is Peter?"

"In the kitchen, looking for his hat."—Gutteries, Madrid.

I find it best for cleanliness

Don't call the plumber when the sink drains slowly. A little Gillett's Lye will probably clear it in a few minutes. Several of other ones around the sanitary house.

GILLETT'S PURE FLAKE LYE

WORLD HAPPENINGS BRIEFLY TOLD

The League of Nations Assembly voted to admit the Republic of Santo Domingo to membership in the league.

Sir Alfred Louis Bower was elected Lord Mayor of London for the ensuing year.

A postcard mailed in Elizabeth, N.J., 14 years ago, just reached Chicago recently.

The residence and mission buildings at Fort Yukon, with contents, including winter supplies and clothing, have been destroyed by fire, according to information brought to Dawson by the steamer Yukon. Defective wiring was the cause of the conflagration.

By an amendment to the criminal code made at the last session of Parliament, and which became effective Oct. 1, slot machines will be regarded as games of chance and their operation illegal.

The sixteenth anniversary of the foundation of the International Working Men's Association—the first international—was celebrated in London, Sept. 28. Karl Marx wrote the inaugural address on September 28, 1864.

The reference to the Supreme Court on Dominion jurisdiction in regard to the eight-hour day is now being prepared in the Department of Justice, and is expected to be submitted to the Supreme Court shortly.

At a meeting of the Senate of Ottawa University, it was decided to affiliate with the University the College of Gravelbourg, Sask., which was founded in 1877 by Archbishop Mathieu, of Regina.

That at least \$75,000 would be spent annually to fight rust, is the view expressed in a resolution by the Brandon Board of Trade, and forwarded to the Federal and Provincial Governments.

NORMAN E. TRIMPER

Dear River, N. S.—My back was so bad I could hardly work. I was always tired out and had no ambition; was nervous and dizzy, and everything seemed to worry me. I also had terrible pains in my right side. I felt badly for about eighteen months, and could not do any work as it should have been done. I tried several doctors, and also bought about \$25.00 worth of medicine, but I found no relief until I took Doctor Pierce's Golden Medicine. Discovery and Doctor Pierce's Anuric (acid uric acid) Tablets. I have taken two bottles of the Discovery, and four of the Anuric Tablets, and can say that I feel as well as I have felt for the last ten years. I feel no further need to give Dr. Pierce's remedies a fair trial. I cannot recommend them too highly for what they have done for me and shall be pleased to answer any one who cares to write me.—Norman E. Trimper, R. R. 1.

Obtain these famous medicines now at your nearest drug store, in tablet or liquid, or send 10 cents to Dr. Pierce's Laboratory in Bridgeport, Ont., for trial package of any of his remedies. Write Doctor Pierce, Bridgeport, Ontario, Hotel in Buffalo, N. Y., if you desire free medical advice.

Policemen Of The Seas

The Heavy Burden Which Must Be Carried By Great Britain

If the United States decides definitely to abandon battleships for aircraft exclusively, the world can only conclude that this great nation is intent upon shirking its moral responsibility to help keep peace on the seven seas of the earth.

For home defense, the battleship is obsolete. But until the science of flying is able to produce an airship capable of successfully patrolling remote areas, as the battleship does, the great Anglo-Saxon power, upon whose ideals of progress depend the peace of the world, must maintain their battle-ships no matter what the cost.

If the United States withdraws from the battleship field to concentrate all defensive expenditures upon aircraft that can operate no further than a few hundred miles from American shores, the whole burden of policing the seven seas will fall in crushing force upon the British Empire.—Vancouver Sun.

"DIAMOND DYES" COLOR THINGS NEW

Beautiful home dyeing and tinting is guaranteed with Diamond Dyes. Just dip in cold water to tint soft, delicate shades, or boil to dye rich, permanent colors. Each 15-cent package contains directions so simple any woman can dye or tint lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings, everything new.

Buy "Diamond Dyes"—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton, or mixed goods.

A horse a man once owned and the wife he is going to get are always the most perfect of their kind.

Thirteen Clark Soups

Soups are no trouble when you have Clark's Soups—simply heat and serve. Your favorite soup will surely be one of the 13 Clark's Soups. All soups used are "Genuine Approved." "Let the Clark Kitchens help you."

In all India are only 14,500 telephones, and of these all but 1,157 are owned by the Government.

A Household Medicine.—They that are acquainted with the sterling qualities of Dr. Thomas' Electric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine and as it is effective in dealing with many ordinary complaints it is an indispensable one. So keep it at hand, as the call for it may come most unexpectedly.

"BREAKING IN" PIPES REALLY SIMPLE TASK

Few pipe-smokers enjoy the process of "breaking in" a new pipe. It's really a simple proposition if a little care be exercised and an effort, which will repay the smoker in almost countless hours of satisfaction from a well seasoned Briar pipe.

The first rule is that a new Briar should never be "started" in a draughty place or out-of-doors. Fill your pipe lightly with some good tobacco like "Macdonald's BRIER," says an expert, and smoke it slowly to avoid too rapid or excessive heating. The pipe should be smoked until every particle of "BRIER" is consumed, so that the "cake" may form at the bottom as well as at the top of the bowl. A new pipe should be allowed to become quite cool before being refilled.

"BRIER," Macdonald's Briar, makes the best fill for any pipe, new or old, and more men smoke BRIER than any other brand in Canada today.

Value Of Enslavement

The feeding of ensilage is one of the most important factors in reducing the cost of winter milk production, says the Saskatchewan Dairy Commissioner. A silo either above or below ground assures an abundance of cheap feed so essential to profits. There were 460 silos in the province in 1923, 367 of which were above ground.

Appeal For Ex-Service Men

Public Asked to Demand That Justice Be Done in Accordance With National Principles

In the Veteran, an organ of the G.W.V.A., and a publication that is doing good service in the interests of returned men, there is reference made in a recent issue to two typical cases of apparent neglect that has come under its notice. One case is of a veteran of three wars, and who served three and a half years in France, and who is now of the age of 46. This veteran is unable to work at his old trade through war disabilities. He received a small pension for three years and was subsequently discharged from hospital, and out of work. He has no money, is unable to work, and was forced to seek refuge in a shelter for down-and-outs. The other case relates to a man in British Columbia, who is a wife and family of small children to serve four years in France. Shortly after his return from the war he was forced to give up his job on account of some trouble which had sapped his energies—he was gassed in France for over two years. The G.W.V.A. sought to establish the right of this man to consideration by the Pension Department, but without success. Subsequently the man died, and his last resting place, that there should be nothing military about his funeral, that he was not to be buried in the soldiers' plot, and that every evidence of his war service should be destroyed.

The Veterans continue: "Neglect is rapidly aggravating the condition of these men with unrecognized war disabilities. Since the Board of Pension Commissioners fails to recognize the consequences of its neglect; since the Senate of Canada has shown a marked tendency at the last two sessions of Parliament to cast aside measures for the alleviation of these conditions; ex-service men are forced to ask the people of Canada to empathize by popular and spontaneous demonstration their demand that justice be done in accord with the national principles. The proof of the need can be found in almost any neighborhood."

Putnam's Corn Extractor

You'll Like This Dessert

A Tasty and Dainty Dessert in Orange Fritters

A dainty tasty dessert is the final touch to any meal, but meals have the habit of occurring so frequently that one runs out of ideas for dishes that will please everybody and yet be simple and healthful. One of the nicest desserts we have run across in some time is this one:

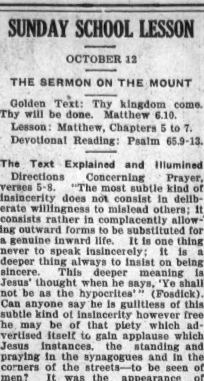

Orange Fritters.—½ cupful Borden's Evaporated Milk, ¼ cupful flour, 1-3 teaspoonful salt, 1 tablespoonful baking powder, 1 teaspoonful sugar, 1 teaspoonful melted, 1 large orange, seedless, powdered sugar. Add the dry ingredients, sifted together, to the milk and then add the shortening. Divide the orange into sections. Heat fat. Dip the sections of the orange one at a time into the batter, slip them into the fat and cook till they are golden brown. Drain on crumpled paper, dust with powdered sugar, and serve with fruit sauce as a dessert.

This recipe comes from the Borden recipe book, which contains a wonderful variety of recipes, from soup to nuts, as the saying is, many of them illustrated in natural colors so beautifully as to make one want to try the recipe instantly. A copy of the book can be obtained without cost from the Borden Company in Montreal on mentioning this paper.

Externally or Internally, it is Good. When applied externally by brisk rubbing, Dr. Thomas' Electric Oil opens the pores and penetrates the tissue, soothing the seat of the trouble and immediately affording relief. Applied internally, it will still the irritation in the throat, which induces coughing and will relieve affections of the bronchial and respiratory organs. Try it and be convinced.

Adversity lifts up many a man whom prosperity had knocked down.

SUNDAY SCHOOL LESSON

OCTOBER 13

THE SERMON ON THE MOUNT

Golden Text: Thy kingdom come. Thy will be done, Matthew 6:10.

Lesson: Matthew, Chapters 5 to 7.

Devotional Reading: Psalm 65:9-13.

The Text Explained and Illumined

Directions: Concerning Prayer, verses 5-8. "The most subtle kind of insincerity does not consist in deliberate willingness to mislead others; it consists rather in complacently allowing outward forms to be substituted for a genuine inward life. It is one thing never to speak falsely; it is a deeper thing always to insist on being sincere. This deeper meaning is Jesus' thought when he says, 'Ye shall not be as the hypocrites' (Psalms). Can anyone say he is guiltless of this subtle kind of insincerity however free he may be of that petty, vulgar, and justified itself to gain applause which Jesus instances, the standing and praying in the synagogues and in the corners of the streets—to be seen of men? It was the appearance of righteousness that the hypocrites counted, not for righteousness itself. To be seen of men is, after all, one of the most influential incentives to human conduct. Some people go into reckless extravagance in order to be seen to have certain qualities that actually to possess them. There are many righteous men in prison while a great many who should be there are outside and seen of men to be righteous; but the average man, if it comes to that, would rather be in the position of the hypocritical ascetic than in that of the publicly confessed hypocrite. Many a refined woman would rather nourish a secret sin than be discovered in a slight one of the same etiquette, and all incline to the Pharisaic preference of a good reputation to deep religiousness. Righteousness means received in full, and is the one used in drawing up receipts. They have received the full reward which they sought, they have been seen of men; they have no claim whatsoever to any further reward."

Corns Soften Away In Foot Bath

Hot water extraction of corns and callouses offers the only perfect way to rid yourself of these painful troubles. Spread a few drops of Putnam's Painless Corn Extractor over the sensitive surface of the corn or callous, and the pain is stopped at once. Later you use a hot foot bath for five or ten minutes, and the corns slip up and drop off. It is a glorious feeling that you get from Putnam's Painless Corn Extractor. It costs but little and is sold by all druggists.

Keep Your CHILD'S SCALP Healthy

Mother! Save your children from painful, disagreeable scalp trouble by applying herbal Zam-Buk to the first itchy spot or soreness.

Zam-Buk is gratefully soothing. It makes the head and hair healthy and sweet, prevents all troubles from spreading, quickly eradicates dandruff, ringworm and other troublesome diseases. Zam-Buk is most effective simply because it attacks disease at the roots, killing poisonous germs and purifying the whole tissue.

Zam-Buk is compounded from certain rare extracts of exceptional healing and germicidal power. It contains no poisonous drugs or animal fats like ordinary ointments, but is a balm of the utmost purity with a far-reaching effect.

Zam-Buk

MOTHER'S BEST FRIEND.

Whenever the skin is cut, burnt, sore, inflamed, or "broken out" in any way, Zam-Buk is always the safest and most reliable healer to use. Keep a box always handy! 50c. all druggists.

Special Service Squadron Reaches Home Port

Returns to Plymouth Harbor After Cruise Around the World

The special service squadron of the British navy, which has just concluded a ten months' cruise of the Empire, among the parts visited being Victoria, Vancouver and Halifax and St. John's, Nfld., received a welcome home at Plymouth recently.

Speaking on the reason for the cruise, the Morning Post says: "The navy has been paid to the bone, and the white ensign has almost vanished from the waters where it was wont to be seen constantly. Our foreign service squadrons have been withdrawn or so reduced that many ports in and out of which British trade flows unceasingly have almost forgotten what a British man-of-war looks like. In times past we were wont to safeguard the lives and interests of British subjects all over the world, and our sea-borne commerce, by maintaining adequate cruiser forces at every station. Today we have to send ships on a tour of demonstration like a stage army which essays to make up for lack of numbers by the brilliance of its entries and exits."

How are the tires on your FORD, CHEVROLET, WHIPPET?

Buy here and SAVE

ALL this week we're specializing on tires for light cars. If yours look as though they were just about to let you down, come in. The Goodyears we'll put on will send you away happy and keep you happy. They're mighty husky tires and we're proud to sell them.

Several prices to choose from. And all unbeatable value at the price.

The Crossfield Garage

F. T. Baker Phone 4

PUBLIC MEETING

Under Auspices of

The Board of Trade

Thursday, MAY 22

In the U. F. A. Hall Commencing at 8 p.m.

Everybody is invited to Attend.

O'Neil News

Mr. Hillyard York has gone to Banff, where he will resume his summer occupation as mountain guide.

Miss Muriel Landymore, who has been in training in the Holy Cross Hospital for the past three years, has finished her duties there and is at present night nurse for Mr. J. Anderson, formerly of Crossfield, who is seriously ill. Miss Landymore will attend graduation exercises at the Holy Cross Hospital on Friday, May 16th.

Miss Ina Fraser, local teacher, is feeling much better and she still has her appendix; the report in the Chronicle last week, being a mistake.

Mrs. Win Landymore, and Mrs. Earl Adams, have each spent a week in Calgary with their mother Mrs. Tennant, who has been very ill.

Mrs. Neil Ross is going in for chickens, having secured three hundred more baby chicks. Her first flocks are nicely feathered-out chickens now.

The Women's Guild will hold their weekly sewing circle at the home of Mrs. Sefton on Thursday, May 22nd. Will all members please attend at 3.30.

Send in your local news. Thanks

Send the Chronicle Home.

W. N. U. 1837

warehouses effective June 11, as provided in Federal Legislation, heavy shipments of liquor from Vancouver to Europe have been made during the past two weeks. Recently the steamship "Pacific Pioneer" took 21,150 cases of bonded liquor back to the United Kingdom and the motorship "Drehtydyck" carried 706 cases.

Peshawar. This was pointed to as a matter for congratulation as well as an indication of the prompt action taken by the authorities.

Great Britain's wealth is estimated at \$112,500,000,000, and that of Germany at \$97,500,000,000.

from "The International Limited" while the train is travelling at 60 miles an hour. At the train switchboard is J. C. Burkholder, Chief Engineer of the Canadian National Telegraphs, who developed and perfected the train telephone system.

China Developing Resources

Will Be Needing Suns Now In Canada, Says Dr. Hsieh

"The new China is calling her sons home and within 25 years there will not be one Chinese left in Canada," declared Dr. Teyli Hsieh, in Windsor, Ont. Dr. Hsieh is a graduate of Cambridge and for years was the only practicing Chinese lawyer in England. He was at one time the Chinese consul-general to Australia, later a delegate to the opium conference in Geneva, and now is acting manager of the Chinese Trade Bureau in Boston, representing the Wiliamson Institute of Politics, and is a representative of the National Chung Hwa News Association of Shanghai. Dr. Hsieh traced the history of China as a republic, telling of the strife made since she had been liberated from the yoke of the Manchus. "The Chinese in Canada," he said, "have been looked upon with disfavor. They have been accused of living on a pittance and sending all their money to China. It must be remembered that, in order to enter Canada before the Exclusion Act, a Chinese had to have \$500. He also had to pledge \$2,000 to the Manchus before he could leave China. Thus he was \$2,500 in debt when he landed here, and there was also probably a family to keep at home. In cases where Chinese have their families here, and have had no debt to pay in China, they have been known for their liberality.

"China has awakened and resources are now being developed. We need leadership most, and that is why we are calling our sons home. Do not look down on the Chinese laundryman and restaurant keeper. They are not that by choice. In most cases they are political fugitives, the highest type of Chinaman, and it is these who will be the leaders in the new China. Canada has taught them how to make a living. They will go back to China and teach the Chinese how to live."

Mining Developments

Will Aid Manitoba

Industries Will Receive Great Stimulus, Says Hon. D. G. McKeen

The Honourable D. G. McKeen, Minister of Mines, speaking at the recent annual meeting of the Winnipeg Board of Trade Mining Bureau, stated that Manitoba industries will receive tremendous stimulus from mining developments. In 1929 alone, with development just getting under way, more than \$12,000,000 had been expended in the province for supplies and wages, he said. At Gypsumville, Manitoba, approximately 130,000,000 tons of gypsum were disposed, and deposits of coal in the Turtle Mountain district were estimated at 100,000,000 tons. The cement industry of the province was meeting the requirements of the market extending from Dryden to Moose Jaw, Saskatchewan, and in 1928 production reached 693,250 barrels, valued at \$1,865,064.

Explains New Instrument

A microscope that, by use of ultra-violet rays, photographs the interior of a living cell, was explained to members of the National Academy of Sciences at Washington by Francis P. Lucas, of the Bell Telephone Laboratories. Lucas said the new instrument was expected to prove valuable in the study of such diseases as cancer, which are believed caused by obscure cell abnormalities.

An Old Type Canoe

An Iroquois canoe, made of a single sheet of elm bark and said to be a good sample of the type of canoe used by the Six Nations before the advent of the paddle, has been placed on exhibition at the Rochester municipal museum. The canoe is said to be the only one left of those actually made by the Iroquois who ceased making them early in the nineteenth century.

"This is freshly baked bread so don't drink water after it." "Don't worry about my drinking water, ma'am." — Nagels Lustige Welt, Berlin.

Wonderful Museum Built By Ringling

King Of Tented Town Finds Outlet For Artistic Ideas

Circus profits have helped to build one of the world's finest art museums in Sarasota, Florida, winter home of John Ringling, king of the tented world, and connoisseur of art. It is to be opened to the public next winter.

While lions roar at the winter quarters of the circus in one section of Sarasota, over the way along the shores of Sarasota Bay, a majestic building presents the circus man's other side. The building and its art treasures have been admitted to the world, and connoisseur of art. It is to be opened to the public next winter.

Only art critics and distinguished visitors from America and Europe have been admitted to the John and Mabel Ringling art museum, so far. Ringling has refused to allow general inspection of the treasure house until it is complete in every one of the details he finds necessary from that side of his nature, which is art.

Near the museum, the circus magnate plans a great art school where students will be only a few hundred yards from works of the John and Mabel Ringling art museum, so far. Ringling has refused to allow general inspection of the treasure house until it is complete in every one of the details he finds necessary from that side of his nature, which is art.

The museum is of striking beauty, a reproduction of the Doge's palace. The entrance is a great archway. Wings extend 400 feet on either side. Eighty-eight sculptures adorn the space between the wings, which is the garden and the patio. Here are stately gardens, statues, fountains and fine Caribbean plants. Columns of the patio are of the twelfth and fifteenth century, brought from Italy. Exact reproductions of Father Time and Father Nile from the Vatican flank the Angelo statue and close the cloister from the southern end.

Beneath the dome of this quiet-nooked museum, there is being built a crypt in which will be laid the bodies of its patrons — Mabel Ringling, who has preceded her husband in death, and the one-time circus wagon driver whose shrine is beauty — John Ringling.

A Wonderful Limousine

Built For Shah Of Persia Is Last Word In Elegance

The man who brags about his automobile may feel less boastful when he learns that a new limousine has just been built for the Shah of Persia along these lines:

Body—White, striped with gold. Fittings—Gold throughout, including headlamps, radiator and hubcaps.

Upholstery—Champagne-colored silk, with diamond embroidery.

Rugs—Imported Russian wolfhound fur.

Accoutrements—Cigarette case and lighter of solid gold encrusted with diamonds. Jeweled crests decorating doors and panels.

Improves On Alarm Clock

Sleepers not easily aroused by the ringing of an alarm clock now may also use a light to tell themselves up. A German clock manufacturer has devised an alarm clock with electric light bulb attached, so arranged that when the alarm rings, the light is switched on automatically. The light is on an extension cord and may be placed so it shines in the sleeper's face.

"What do you think of the present situation," a politician was asked. "Don't bother me," he answered. "This is no time to think, I've got to talk."

Forecast Crops By Sun Spots

New Study Professor Believes Old Astronomers Used This Method

Was Joseph, in his prophecy of the seven fat years, and the seven lean ones, a class A-1 prophet, or was he merely in possession of astronomical information which, wonderful as it may seem, told him that a seven year period of good crops, to be followed by the same period of lean ones, was at hand? Such is the question raised by Professor Richard Hesser, Dean of Physics, at Acadia University, Wolfville, N.S. Professor Hesser states that it is not at all impossible that at the time of Joseph, students of astronomy, the oldest of sciences, might have been sufficiently advanced to know of the apparent effect of sun spots on the crops, and to prophesy their recurrence.

During the past few years, Prof. Hesser has made a study of sun spots, and of the apple crops in the world-famous Annapolis Valley, during the years when the spots were plentiful, and when they were few. His study has led him to believe that when the spots are at their maximum in number, there is a large crop of only fair quality. On the other hand, when the spots are at their minimum, the crop, while small, is of excellent quality, and a good return to the farmer is secured.

By the furtherance of such research, he states, it may be possible to forecast with reasonable certainty the quality and size of the crop in any given year, thus enabling the farmer to devote his time to the activities which will bring him the greatest return. For example, during a season in which the crop will probably be of poor quality, the farmer would devote his time more to field crops than to his apple.

Sun-spots, which are huge tongues of flickering flames, extending thousands of miles from the surface of the sun, seem to have an appreciable effect upon the weather, the rainfall and the ultra-violet spectrum, according to Prof. Hesser, and these conditions, of course, greatly affect the crops.

Beef Grading Policy Expanding

Consumers Appreciate Knowing Quality Of Meat They Purchase

Six months in operation finds the Beef Grading Policy of the Dominion Department of Agriculture expanding rapidly from coast to coast. Not only are all the larger packing houses "branding" beef, but consumers generally are beginning to appreciate the advantage of buying "branded" beef.

"Blue" Brand beef because of the excellence and dependability of quality assured by the government brand. Every important cut on the beef carcass is stamped by the brand, and the customer can tell at a glance that the quality ordered has been delivered. "Branded" Beef is particularly popular where beef counts. All the better class shops now carry it, and the others are only awaiting consumers' demand to stock it.

One-Man Jazz Band

Jazz players of Hungary are alarmed over the new invention of Francis Szekeres, a Hungarian musician, by which one man, playing the keys, can produce every sound known to jazz band players. Szekeres recently received a letter signed "Desperate Jazz Players, Hungary," threatening a bomb explosion at his home, if he does not stop the manufacture of the apparatus.

There is an alabaster mine in Italy that has been worked continuously since it was opened by the Etruscans more than 2,000 years ago.

First Electric Telegraph

Was Invented By Sir Francis Ronalds In 1816

Who was the inventor of the electric telegraph? Most people would hesitate over the answer, and if you asked further when it was invented, they might be reduced to mere guessing. Recently, however, a portion of a copper cable, used in the earliest experiments in electric telegraphy, was presented to the Science Museum at South Kensington. It had been buried in the ground for well over 100 years. It was in 1816 that the electric telegraph was invented, and the inventor was a famous meteorologist, Sir Francis Ronalds. He offered the invention to the Admiralty, but their reply was that "telegraphs of any kind are now totally unnecessary, and that no other than the one now in use will be adopted." The telegraph "now in use" was a semaphore telegraph. Ronalds' invention was of real practical use, though it took rather a long time to transmit messages. This would, doubtless, have been remedied had he continued to work at the idea, but the Admiralty's reply discouraged him, and he turned his attention to other subjects.

Greenhouse Heated By Natural Hot Springs

Fresh Vegetables Available In May Near Nome, Alaska

Fresh spring vegetables, a rare event until the first boat arrives late in June, says an item from Nome, Alaska, will be the novelty offered there in May from a greenhouse heated by natural hot springs right under the Arctic Circle. Baker Hot Springs, seventy-five miles north of Nome, consists of seven bubblers from the earth at the foot of Starvation Mountain, fifty feet above sea level. Several hot out at a temperature of 160 degrees Fahrenheit winter and summer. Water from them runs through a 320-acre tract suitable for farming, of which about fifty acres were planted last year to root crops and hay. G. D. Schofield, lessee, last fall erected a greenhouse over one spring, and prospects point to cucumbers, onions, radishes, lettuce and tomatoes. On all sides of the hot springs lie ages-old ice to an unknown depth.

Unavoidably Detained

Woman Had Good Excuse For Selling Old Magazines

There is an alleged small mission in the wilds of Illinois whose welfare workers suffer to the stage of martyrdom to help further the worthy cause. Just recently an elderly woman visited a bank in Woodstock, Ont., selling a monthly magazine for 15 cents just "to help the girls and boys of the mission." She found many sympathizers. When she left the bank one of the purchasers glanced at the paper—it was an August, 1929, issue. Overtaking the woman he asked for an explanation. Her explanation was unvarnished as she looked her customer right in the eye: "I've been detained by snow and rain." Then she plodded on her way.

Registered Seed Not Demanded

Registered seed is not demanded of Canadians exhibiting at the World Grain Exhibition and Conference, as there are many countries which do not register seed grains. There are also some varieties, such as Reward wheat and Gopher oats that are not eligible for registration in Canada. It is said, though there are expected to be numerous exhibits of these two varieties of grain.

Way Back Under the Cry

Full dinner pail. Now, everybody is happy if the gas tank is full.

Registered Seed Not Demanded

Registered seed is not demanded of Canadians exhibiting at the World Grain Exhibition and Conference, as there are many countries which do not register seed grains. There are also some varieties, such as Reward wheat and Gopher oats that are not eligible for registration in Canada. It is said, though there are expected to be numerous exhibits of these two varieties of grain.

Museum At German Airport

Machines Dating Back To First Flights Are Exhibited

Aeronautics from the earliest beginnings to the present time, are included in displays at a new aeronautical museum, at the Berlin-Tempelhof airport, in Germany. Among the exhibits are several original machines, dating back to the first attempts at flying. These include those of the Wright brothers, the first powered "plane," such as those produced by Grady, and the formerly well-known Ruppel "Taube." Models of post-war craft are shown and a special section is devoted to the construction of airships.

New Roofing Material

The Canada Gypsum Company's plant at East Calgary, is now turning out "zonolite" which, it is claimed, mixed with asphalt, makes a roofing material that is as fireproof as asbestos, lighter than cork, frost proof and having scarcely any expansion or contraction.

Construction Is Simple

Shows How Only Tool Eskimos Use In Building Igloo

Along the ice-bound northern shore of Canada, live a race of men—the Eskimo—who have achieved a simplicity in architecture that ranks with the most rapid in history. Dotted here and there within the Arctic circle, are snow-houses, called igloos, whose first designer must have been a man of rare genius.

Architecturally, the Eskimos can point only to the igloo as an achievement, for the virtually no other building is used by the dark-haired, dark-skinned wanderers of the north. Part of the year is passed in the tupik, or eskakin tent, but this shelter is abandoned as soon as frost and wind have rendered the snow hard enough to be cut into building blocks.

But the igloo, hemispherical little snow hut, is an oddity that borders on the marvelous. It is probably the only sturdy structure—unless, perhaps in the tropics—that is constructed with a single tool from material available anywhere in the Arctic. The necessary implement is the snow-knife, about 15 inches long, and the material used is ordinary, everyday northland snow.

Nomad nature of the Eskimo, no the occasioned the simplicity of construction of the tiny little dwelling places. Just two men are needed to build an igloo. From firm snow, wind-swept and frost-hardened, the blocks are sliced with the snow-knife. The blocks measure some 2½ feet by 15 inches, and are 10 inches thick.

Foundation-laying for an igloo comprises laying a series of blocks, inclined slightly inward, in a 12 or 14 circle. By skillful use of the snow-knife, the blocks are fitted closely together. Then one of the constructors takes his place within the circle while his mate bears new snow blocks from the pile, prepared ahead of time.

A second tier of blocks is placed, with great nicety, upon the foundation row, sloping somewhat more inward than the first. Just as carefully, a third tier is laid, with still greater inward inclination; row after row is added until the igloo's roof arches gracefully over the builder's head. Finally, only a small aperture at the top remains; into this the finishing keyhole-shaped wedge, wedge-shaped and edged gently into position.

Before the latter stages of the building have been finished, however, it is necessary for a hole to be cut in the side wall, near the base. Through this aperture are slid the blocks which make up the upper tiers of the igloo, for at this stage the structure is too high for the worker on the outside to hand the snow-blocks conveniently to his companion. A finished igloo dome is 8 to 10 feet high.

Inside the Eskimo residence, a snow-block of about 2½ feet in thickness is laid. It covers the entire floor with the exception of that portion adjacent to the aperture in the side wall, which is shaped in a quasi-cubic arch, about 3 feet high and two feet wide. A porch is constructed to shelter the doorway from the wind, and an 18-inch-square window of sliced-down ice, is set into the wall.

With this, the architecture of the igloo is completed—and Mrs. Eskimo sets about furnishing the new apartment. She spreads wool mats on the snow floor, and places on them a bedding layer of deer skin. It is also the lady of the family who mounts on the dome of the igloo and plugs with small wedges of snow, the interstices between the blocks. When whole-lamp lamps are flickering within and a square of snow is pulled up in the doorway, an igloo is a cozy spot even if winds are high and temperatures low.

Profit In Turkeys If Care Is Taken

Canast, Be Successfully Reared In Clean Confinement Or With Other Fowl

Turkey breeding is not the difficult undertaking that is generally supposed, when the breeding stock and point are properly handled. Essentials to success in turkey breeding are: Clean soil, mature stock for breeding, good foods properly fed to both mature and young stock, free range and above all the keeping of the turkey flock away from other barnyard fowls, writes A. G. Taylor, of the Central Experimental Farm, Ottawa.

Soil that is contaminated with the droppings of fowls of any kind is not desirable soil on which to rear turkeys. If it is impossible to have soil which has not previously been used for poultry keeping make sure that the land does not become and thoroughly cultivated. A desirable soil for turkey raising is one that is light and porous in texture—sand or gravel being desirable. Lying and heavy clay soils should be avoided, especially for the raising of poults.

Breeding stock should be well mated, especially the females. Good yearling birds are preferable to any other age. Well developed cockerels may be used to advantage, but should be bred on mature females. Avoid using males which are overgrown and also the use of females which are over standard weight, as they produce many of the eggs at hatching time.

Feeds for turkeys should be made of sound grains, and in no case should shrunken grains be used. Grains that have become moulded or heated in any way should be avoided. Good mash of the above grains can be used and should be fed in self-feeding hoppers, so that the birds can help themselves. Feed the grains and mash in wooden troughs and avoid allowing the turkeys to eat their food from the ground, as this is a frequent source of contamination. Poults should be fed regularly in this way avoid the possibility of the birds over-feeding. Good mashes, finely ground, fed in the dry state are recommended in a commercial way. The feeding of finely chopped hard boiled eggs and stale bread crumbs is also recommended.

Young turkeys may be hatched naturally or in incubators, and brooding may be carried on in either the natural or the artificial method. Protection should be afforded the young birds until they are at least two weeks old, after which time they may be allowed more freedom.

The turkey is, strictly speaking, a fowling bird, and cannot be successfully reared in close confinement. While it is possible to keep poults in a small space and still make rapid growth, cheap gains are only possible on free range.

Find Business Good

Approved hatchery men and business good this year, the field staff of the Poultry Division of the Dominion Department of Agriculture report. They also report that the sale of hatchery chicks follows the weather very closely—when the weather is good sales are good. "Approval" is making rapid headway and increased egg production for the big winter market is predicted.

Due To Superstition

When the great plague visited England in 1665, all sorts of cures and drugs were taken. Among others, smoking was believed to be a preventive. Consequently the children were made to smoke. One historical states: "The boys at school were never whipped so much in all their lives as they were for not smoking."

"I Can't Let You Have Poison"

"No, but here is a portrait of my mother-in-law." — Lustige Kolner Zeitung, Cologne.

"An ounce of veronal for my mother-in-law." "I can't let you have poison. Have you a prescription?" "No, but here is a portrait of my mother-in-law." — Lustige Kolner Zeitung, Cologne.

NEW CANADIAN NATIONAL STEAMSHIPS

An artist's drawing of one of the three new turbine steamships which the Canadian National Steamships are having built at Birkenhead, for use on the Pacific Coast between Vancouver, Victoria, Seattle, northern British Columbia points and Alaska.

The steamships are to be called SS. Prince David, SS. Prince Henry, and SS. Prince Robert. They will be 384 feet in length and 57 feet wide with a maximum load draft of 16 feet 6 inches. They will carry 334 first class, 6 third, and 1,569 deck passengers. The accommodation will include 20 deluxe rooms with twin beds, bath and shower, and 20 rooms with single bed and shower bath. The ships will be fitted with wireless broadcast receiving apparatus with loud speakers for the entertainment of passengers, and telephones will be placed in each room. There will be cargo space of 45,000 cubic feet with an additional 4,370 cubic feet of insulated cargo space, as well as accommodation on the main deck for 30 automobiles.

Work on the new ships is now proceeding and they will be put in service for the summer season of 1930.

CHAPTER XI.—Continued

"Well, I was bursting to tell you seemed as if I couldn't get here quick enough. I knew Charmian was out, too, and thought maybe you'd like company. Besides, I wanted to borrow a lump o' butter for my dinner. I almost forgot it, same as I forgot to order when the boy come round. Don't you get up, Grandma, I know your ice box most as well as I know my own."

"And good reason, too," murmured Grandma to herself as Miss Lizzie waddled off. "Seems as if in the last thirty years there's nothing Lizzie Baker hasn't borrowed of me—unless it's my tooth brush."

She turned to the window, stared for a moment, and then exclaimed: "Why, here comes Lawyer Garfield! What on earth does he want of me?"

CHAPTER XII.

Charmian was finding her old schoolmate a rather unbecoming companion this morning. Once Grandma's cheery presence was left behind, he slipped into silence, and was to all appearances giving his entire attention to the car. He didn't speak until they drew up before the Bascom house with its expanse of glaring window glass.

"I'll run in," said Charmian. "I can get away from Emmy quicker than you can, and we mustn't linger." "I'm not liable to linger with Emmy Bascom," replied Jim, stepping out before Charmian could move. "Of all the bodes—"

He left the sentence unfinished, and strode up the path, while Charmian, who agreed with him about Emmy, smiled to herself as she watched him enter the side door without waiting to knock. She was regarding the new windows disapprovingly when he came out, tossed Grandma's catalogue onto the back seat, and said, as she started the engine: "Quick work that—considering Emmy's ordering a hat — by mail!"

The suspicion of a smile curved his lips, and Charmian laughed outright. "Did she ask your advice, Jim? I

Daughter Is Stronger Now

"My daughter Catherine is fifteen years old. She was very irregular, often sick at her stomach and had to stay in bed two or three days at a time. One of your booklets was sent to us by mail so I got her a bottle of Vegetable Compound. Catherine has been taking it regularly and she is gaining in weight and every way. I told the neighbors and four other girls are taking it with good results."—Mrs. Clarence Jenkins, Box 14, Thorncroft, Ontario.

Lydia E. Pinkham's
Vegetable Compound

W. N. U. 1887

had to struggle as this poor woman must be struggling to keep the wolf from that shabby, sagging door? Was it just part of the day's work to them—collecting what must be the pitiful savings of weeks and months? And was Jim, who seemed so kind, like all the rest? Didn't he care? . . .

Charmian pulled herself together suddenly, realizing that Jim had been gone some time, and that unless he hurried Doctor Carter would undoubtedly dine on the contents of a cold bean pot. Then the door opened, and though the woman smiled and shook hands with Jim, Charmian saw the unmistakable traces of recent tears in her red-rimmed eyes, and the girl's heart hardened a bit toward her old playmate and the harsh world of business that was a part of him.

"Did she say it?" "The question came almost against her will as they started back." "She did," said Jim. "That's why I went there, wasn't it?" "And you don't feel like—like Shylock?" burst from Charmian in sudden, overwhelming indignation. Jim looked at her in amazement. "Why in thunder should I feel like Shylock?"

His voice was cheerful, more cheerful than it had been since they started out. "If you don't know," Charmian replied coldly, "it would be useless for me to try to tell you. And it was she who was silent on the ride home."

CHAPTER XIII.

Sorry the ride wasn't more of a success," said Jim, as he left Charmian at the side door.

He smiled rather wistfully; but it was the words, not the smile that lingered with her as she turned on the stone steps. Something in Jim's voice had brought back the uncomfortable feeling she had experienced earlier that day, when she thought she had hurt him. And he was right. The ride hadn't been much of a success. Charmian was, she told herself, ridiculously disturbed about it. Only the persistent pounding of Great-grandfather Davis' gold-headed cane, roused her to the fact that she hadn't run in to speak to Grandma, as was her almost invariable habit on reaching home.

"Well," exclaimed the old lady, as her granddaughter appeared in the doorway, "so its you! I didn't know you'd be a tramp, so I made all the noise I could. When Jimmy? Gone? Dear me, I had something to tell him. You needn't rush 'round so, child, because the doctor won't be here to dinner. They're taking some one to the hospital and he's gone. He telephoned an hour ago. Sit down, Charmian, and let the dinner wait. There's news a-plenty."

"News? Who brought it?" "Lizzie Baker," said Jim, like to die of apoplexy she was, from running. And after she'd gone home (by the back door after borrowing some butter), Gam Garfield brought the rest of it. He wanted to know the value of those beads we sold the deacon?"

Charmian sank limply into a chair. "Don't tell me we've got a law suit on our hands!" "And no sooner was Lizzie gone than I looked out and saw Gam Garfield crossing the street in a Beatle, me a start! He walked in kind of solemn, too. He likes to look that way when he has a case—sort of important. But I wasn't going to have little Gam Garfield put on me with me; so I said, 'Morning, Gam. I was just thinking of the time I caught you hanging by the seat of your trousers from our Porter apple tree. You were seven years old, and you'd eaten yourself sick, so I didn't have the heart to give you the spanking you deserved for stealing fruit! That sort of—well, took the wind out of his sails, as you might say.'"

(To Be Continued.)

Persian Balm promotes cleanliness, charm and beauty. Magical in its effect on the skin. There is nothing like it for creating and preserving a lovely complexion. Caring, caressing, it soothes and relieves all roughness caused by weather conditions. Delicately fragrant, it enhances the most finished appearance. Makes the skin rose-leaf in texture. Truly a peerless toilet requisite for every discerning woman.

Eidon, the smallest parish in Hampshire, England, has a church, three cottages and a population of twelve.

Base Ball

Baseball players use Minard's for stiffness, strained ligaments and bruises. They also recommend it as a rubdown.

MINARD'S
"KING OF PAIN"

Not Breaking Down

Is Strong As Ever Among Orthodox, Says Missionary

"For public service in India," engraved on the back of an imposing-looking medal, bearing the King's insignia, is, in brief the story of Dr. Margaret MacKellar's 40 years' sojourn and medical work in the Empire of the East, and of a king's recognition of a lifetime of devotion. It is the Kaiser-Hind Medal, second only to the Victoria Cross, and was planned on Dr. MacKellar by Sir Michael O'Dwyer. It is awarded regardless of creed or color, and was, in this case, presented mainly for outstanding work during famine and plague.

But there is another medal of which Dr. MacKellar, a gracious modest, little lady, with a very large heart, overflowing with India's need, is acutely less proud. This medal is of pure gold and has four gold bars attached, one for 25 years of service, because such medals are given only to those who have served in India for a quarter of a century, and the other three denoting five years each. It was presented at the diamond jubilee of the Presbyterian Church in Canada, which met in Montreal, in 1924. The last two bars were added recently.

Dr. MacKellar is a graduate of Queen's University, and she celebrated the 40th anniversary of her sailing from Halifax for India on May 8, this year. Forty years ago her doctor's service was held at Ingersoll.

"The caste system is not being broken down in India, and never will be, for, although caste is not recognized by the Christians, it is as strong as ever among the orthodox," the missionary said. There are no less than 17 different caste-houses in connection with the hospital, so that women of different castes may have their food prepared separately.

In the sunlight on one side of the street walks the high-caste men, and in the shadow of this side slinks the low and outcast. There are 22,000,000 who are literate to some degree, but that is only 22,000,000 of 320,000,000.

Campers Carry Minard's.

Had Excellent Idea

South Carolina Editor Expected To Profit Two Ways

Robert Quillen must have thought he could hit two birds with the one stone when he ran this ad. In his unique Fountain Inn, S.C. Tribune:

Free Rooster Saturday
Some weeks ago I bought a white Leghorn rooster. To be Garrett says he is worth \$25. But the rascal crows at 3 a.m. and I don't get to bed until after 12. Being waked at 3 a.m. away Saturday to somebody who pays a year's subscription. You may be the one to get him. If only one person pays his subscription, he gets the rooster. If two pay, we'll draw. If a dozen or more pay we'll draw.

Conventions In Maritime

Two important conventions are to be held in Wolfville, Nova Scotia, during June—that of the Canadian Seed Growers from the 19th to 21st of that month, and that of the Canadian Seed Testing Association a week later. As regards the second unit, it is the first time that the Maritimes have been chosen for its convention.

Radio-telephone conversation which was held recently between New York and Sydney, Australia, by way of London, a distance of 16,000 miles, is said to be the longest on record.

Teach Blind Children Physical Training

Unable To See Instructor Boys Follow Commands Easily

Blind children, handicapped by their lack of sight, have overcome many obstacles imposed by nature, but probably one of the most important achievements to their credit within the last year is their triumph in the realm of physical training, an insight into which was given at a class conducted by H. O. Patterson, physical director of the Central Young Men's Christian Association, at Montreal.

Unable to see their instructors, the boys followed the commands with the practiced ease of their more fortunate brothers who can see, and it was explained that, as a result of the carefully conceived plan for training these children, it was possible to lead them in certain exercises, the object of which is to help them increase their physical fitness. Still, results have been obtained with deaf and dumb children.

GIVE CONFIDENCE TO YOUNG MOTHERS

A simple and safe remedy for the common ills of babyhood and childhood should be kept in every home where there is either a baby or a young child. Often it is necessary to give the little ones something to break up a cold, allay fever, correct sour stomach, and banish the irritability that accompanies the cutting of teeth.

Experienced mothers always keep Baby's Own Tablets in the home as a safeguard against the troubles that seize their little ones so suddenly and the young mother can feel reasonably safe with a box of these Tablets at hand and ready for emergencies. Baby's Own Tablets are a mild but thoroughly laxative that act without griping and they are absolutely guaranteed free from opiates or other harmful drugs. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Splendid Record

Lifeboats stationed around the coast of Britain and Ireland, manned by volunteer crews, have saved 62,187 lives in little more than a century, an average of eleven lives a week.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother's Own Worm Expeller.

Use Minard's for Burns.

The sea of matrimony is very rough. That is why one voyage is usually enough.

"I Was Skinny and Tired. Now Peppy. Gained 11 Lbs."

"Had tired feeling, no pep. But Ironized Yeast gave me pep; much stronger. Gained 11 lbs. Boils and pimples disappeared." — Mack LaTorcia.

"Amazing new Ironized Yeast adds 5 to 15 lbs. in 3 weeks. Changes 'skinny' weak body to strong, well-developed form all admire. Blochy skin gets clear and rosy like magic. Nervousness, indigestion, constipation disappear overnight. Sleep. New pep from very first day. Two great tonics in one—special weight-building, Malt Yeast, and strengthening Iron. Pleasant little tablets. Far stronger than unmedicated yeast. Results in 3 1/2 times. No yeast taste. No gas."

Don't be 'skinny,' weak, unattractive. Get Ironized Yeast from drug store today. Feel great tomorrow. Money back from manufacturer if not delighted with quick results.

Little Helps For This Week

"Whoever will come after Me, let him deny himself, and take up his cross, and follow Me."—Mark viii. 34.

The cross is not so hard to bear since I have learned to say, O Lord, I walk not anywhere. Unless Thou lead'st the way.

Both above and below, which way soever thou dost turn thee, everywhere thou shalt find the cross; and everywhere of necessity thou must have patience if thou wilt have inward peace, and enjoy an everlasting crown.—Thomas A. Kempis.

To rebel one's freedom is to make it heavier.—Henri Frederic Amiel.

Coal mines of France have orders for more coal than they can produce.

EVERY BIRD LOVER should have this new revised edition of "Brook's Book on Birds"—replete with 144 pages of valuable information on the treatment of bird diseases and the care and feeding of cage birds. It also contains 50 pages of practical advice on the treatment of bird diseases.

The regular price is 25 cents, but to readers of this paper who order 10 copies or more, the price is 20 cents. Address: BROOK'S BOOKS, 100 N. W. 10th Ave., Minneapolis, Minn. A copy of Brook's Book on Birds will be sent along with a generous sample of Brook's Bird Food on request. The food is prepared from the finest seeds, selected from all parts of the world, together with a real treat for your bird, a mixture of Brook's Bird Food, a taste that brightens the plumage and strengthens the song.

Every Bird Lover Should Have This Book

Keep FIRE at Bay with GYPROC

FIRE seldom visits houses having Gyproc Wallboard ceilings, partitions, walls and sheathing. On the contrary Gyproc has saved many homes.

This pioneer Canadian fire-safe gypsum board has a new Ivory coloured finish this year that makes decorations unnecessary (when painted). It is just the thing to use for making extra rooms in the cellar or attic.

Quickly erected, inexpensive, structurally strong, Gyproc Wallboard gives permanent fire protection.

Your dealer's name is listed below. Ask him today for full information or write for interesting free booklet "Building and Remodelling with Gyproc."

ments cancelled.

THURSDAY, MAY 15th.

The local merchants have been
doing a thriving business lately,
especially last Saturday. The rail-
way contractors have been buying
a lot of their supplies locally, and
our local prices must be fair to get
this business.

Believe me, you pay for anything
you get in Calgary or any place
else, and outside of a leader or
two, you can buy as well or better
right here in Crossfield.

Money spent in Calgary will
never help build up your own
town. Friendship and local pro-
gress is worth far more to you
than the supposed saving of a few
nickles that cost you a few dollars
to get. Buy at home—with your
friends.

Weed Control Programme

The Alberta Department of Ag-
riculture has now completed its
plans for the weed control program
of 1930.

Under the Field Crops Branch
the Province has been divided into
fifteen districts. In each of these
districts a Field Supervisor will be
stationed. His duties will be to
co-operate with weed inspectors ap-
pointed by Municipal Councils, and
in Local Improvement Districts, in
general Weed control work and the
enforcement of The Noxious Weed
Act.

Farmers of the Province are urged
to avail themselves of the ser-
vices of these men. Their office
centres are being advertised in this
issue.

Clean Up!

Spring is now well advanced and
it is time for those who have not
already done so, to think about
cleaning up their premises for the
summer.

There is nothing that adds so
much to the appearance of any town
as the cleanliness of its streets, lanes
and premises.

The Village Council have an ad-
vertisement in this issue and it is
their intention to see that a general
clean-up is made.

We had prohibition in Alberta
some years ago and we all remember
what a rotten mess it was. We
have a good liquor act in Alberta
and we better leave it alone. This
might not sound so good to one
gentleman in Alberta who pulls
down a fat salary for talking pro-
hibition. Who wouldn't?

Union Church Services

On Sunday evening next at the
United Church, the choir will sing
the Anthem "Fear Thou Not".
Mr. Young will continue to speak
on the subject of Pentecost.

Service will also be held at Rod-
ney at 11 a.m. and at Tan-y-Bryn
at 3 p.m.

Village of Crossfield

**Notice to Clean Up
Yards, Premises and
Stables**

NOTICE IS HEREBY GIVEN
that all manure piles at stables must
be cleared away and taken to the
nuisance grounds before the 25th.
of May.

Notice is also given that all yards
and premises must be cleaned up
by the same date. Garbage must
be put in boxes, barrels or tins and
placed in the lanes when it will be
removed by the town man to the
nuisance grounds.

J. M. WILLIAMS,
Mayor.

Do your shopping in the adver-
tisements first.

Local and General

W. K. Gibson was business vis-
itor in Calgary on Monday.
Arnold High of Calgary, spent
the week-end with his family.

Scribbler 6 for 25c at the Chron-
icle office.

Mrs. Ivor Lewis is visiting in
Calgary today.

Thos. Tredaway was a business
visitor in Calgary on Wednesday.
Heavy Williams spent the week-
end in Calgary.

Mr. and Mrs. O. E. Jones were
visitors in Calgary on Friday.

Rev. J. T. Adams-Cooper spent
Tuesday in Calgary.

Matt Hewitt delivered 30 barrels
of gas and oil to C. P. R. con-
tractors at Cremona on Wednesday.

Mr. and Mrs. W. K. Gibsons and
Mr. and Mrs. R. G. Gibson motored
to Olds on Sunday.

Mr. and Mrs. Chas. Gray and
daughter of Calgary spent Sunday
at the home of Mr. and Mrs. M.
Hewitt.

Wm. Murdoch left for Edmon-
ton on Tuesday to attend the Con-
federation Life Insurance conven-
tion.

Mrs. Robert Whitfield who has
been visiting here and at Calgary
for the past two weeks, left on Sat-
urday for her home at Alex.

Miss Margaret Murdoch of Cal-
gary spent the week-end at the home
of her parents Mr. and Mrs. Geo.
Murdoch.

Mrs. (Sadie) Robertson, who has
been staying at the Oliver Hotel
for the past month, left on Monday
for Banff where she will spend the
summer.

The rain and sleet storm on
Friday night kept many away
from the Tennis Club Dance,
but those who did attend report a
splendid time.

Several Horse Shoe Clubs have
been organized throughout Alberta.
How about a Club for Crossfield
and district. We have several good
pitchers in and around town and
should have no trouble in arranging
week-end matches.

A good many from town have
motored out to Geo. Murdoch's
west farm to see the giant power
shovels at work on the new railway
grade. These shovels and trucks
work night and day and its a sight
worth seeing.

Mrs. T. Pepper of Laura, Sask.
spent several days last week at the
home of Mayor and Mrs. J. M.
Williams. Mr. and Mrs. Williams
and family and Mrs. Pepper motored
to Calgary on Sunday and
spent the day with the latter's
daughter Mrs. Geo. Walker, Mount
Royal, Calgary.

Local and General

The Crossfield junior baseball
team journeyed to Calgary on Satur-
day and although defeated by the
Calgary juniors they put up a
good game. We have a lot of com-
ing ball players right here in Cross-
field and all they need is a little
encouragement.

"Thus ended a splendid series
of programs, that have been revela-
tions in gifted orators and brilliant
musical organizations, and it is
pleasure to announce that Chaut-
auqua will be here again next year,
the guarantors' list have been fully
subscribed to."—Miner and News,
August 20, 1928—Kenora, Ont.

The regular monthly meeting
of Floral U.F.W.A. was held on
Wednesday afternoon at the home
of Mrs. R. M. McCool. The meet-
ing was largely attended and many
visitors were present. Mrs. W.
Hays of Olds, a former resident of
Crossfield was also in attendance.

Considerable business was trans-
acted, the main item being the
election of delegates to attend the
Cochrane Constituency Nominat-
ing Convention in Calgary next
Monday.

The regular monthly meeting
of the Sunshine U.F.A. local was
held Tuesday evening. There was
a good attendance and enjoyed R.
M. McCool's address on the work
of the last session of the legis-
lature.

At the conclusion of the meeting
they passed a unanimous vote of
confidence in their present mem-
ber.

The regular monthly of the Flora
U.F.A. will be held at the East
Community Hall on Saturday, May
17 at 8 p.m. This will be a public
meeting and every one is cordially
invited to be present. Among the
many important items to be dealt
with is the election of delegates to
the Cochrane Constituency Conven-
tion to be held May 19.

If you have any interest in your
representative in the Provincial
House you should attend this meet-
ing. Be sure and be there.

Guy Gazeley and Walter Spivey
have secured two settings of Ring
Necked Pheasant eggs and they
intend to put the pheasants out
with different farmers providing
they have any luck in hatching
them out.
